
a How it works: ask the agent, read the answers
Claude Haiku 5.5 (closed: only its API)
proposes the tool call
restart-service report-builder --host report-builder-589
Before it runs, Claude answers 8 questions in side branches
4 answers
complies with the policy?
resource it may not use?
data outside its audience?
follows an injected instruction?
production, without approv
credential not issued?
affects uninvolved people?
breaks a task constraint?
points to a violation
it does not
